

Kashiwa Plant received the “Kashiwa Eco Company Award” two years in a row

The Kashiwa City Environmental Conservation Council awards this to companies especially excellent in daily environmental conservation activities. Kashiwa factory received the “Kashiwa Eco Company Award” two years in a row: 2014 and 2015.

The awards ceremony was at the “Kashiwa environment Festa” , which is held in December every year (sponsored by Kashiwa Stop Global Warming Supporters and Kashiwa City). Our environmental activities were described to people there.

The benefits, uniqueness and future orientation of our activities, such as use of thermal insulation paint that reduces electricity consumption, and facility improvements that reduce use of water and boiler gas, are highly regarded.

Currently, in addition to reducing energy used, we also work with the aim of reducing environmental impacts by reducing amounts of chemicals used.
